

Hello there,

I have worked with clients from a broad range of industries to create bespoke, responsive web design and development solutions. I don't want your money before you have seen what I can do. Quite simply, if you don't like my design you don't pay for it.

I will not only produce outstanding unique designs specifically for your business, and ensure that the website gives you an early return on your investment, but also that it promotes exactly who you are and what you do.

I create responsive web design ensures the perfect user experience on phones, tablets and any other device from which users access the internet.

Following are the websites I recently developed for my clients:-

<http://moombatheater.com>

<http://giggletix.com>

<http://vultureculture.com.au>

<http://www.sheerargan.com/>

<http://zoozootv.com/>

<http://sublimewebpro.com/projects/zoozoo/>

I will give you everything you need to make your website succeed including outstanding web design, communication throughout the project, suggestions, advice and ideas. If I think there is a better way for you to achieve your goals, we will make you aware of it.

Let me know if you have any questions.

Thanks

Mukesh

Dear Hiring Manager,

In review of your project objectives on Odesk, I believe that my experience is in perfect line with your current project needs.

After the Penguin 2.0 update and panda I have made changes to my SEO strategies. As per new SEO strategies, I outline custom SEO Plan for each website comprising active presence on social media platforms, aggressive engagement in guest blogging, participate in forums and find other ways to create relevant, natural backlinks that help me survive Penguin 2.0 and should shield client's website from harm during future search engine algorithmic updates too.

Regarding link building strategies, I follow 2 tier link building strategies and blogger outreach. these strategies consists of Getting relevant editorial links on blogs with real traffic... building a layer of web 2.0s around your tier one backlinks, Article Directories / Wikis – these links offer the same power as fresh web 2.0s, High PR DoFollow Blog Comments, Social Bookmarks (They aren't

very strong, but they're cheap and great for diversifying your anchor text and link profile)

After getting these links set up, I work on social signals -it's pretty simple, I hit your tier one PBN articles, guest posts, and web 2.0s with social signals.

Here are some of the projects which I have done in the past or are currently another that give you an overview about our work process:-
